1. Introduction

Black Duck manages and catalogs third party intellectual property within product releases with transparency. The software automates key processes such as third party intellectual property requests and approvals. This document outlines steps for basic use which include: how to request use of a third party intellectual property component, how to manage the bill of materials[1] for a release, and how to clone existing products for future releases.

2. Log in

URL: http://codecenter1.tibco.com/codecenter/CCLoginPage?uifsid=0#0=bc,eU,eJ

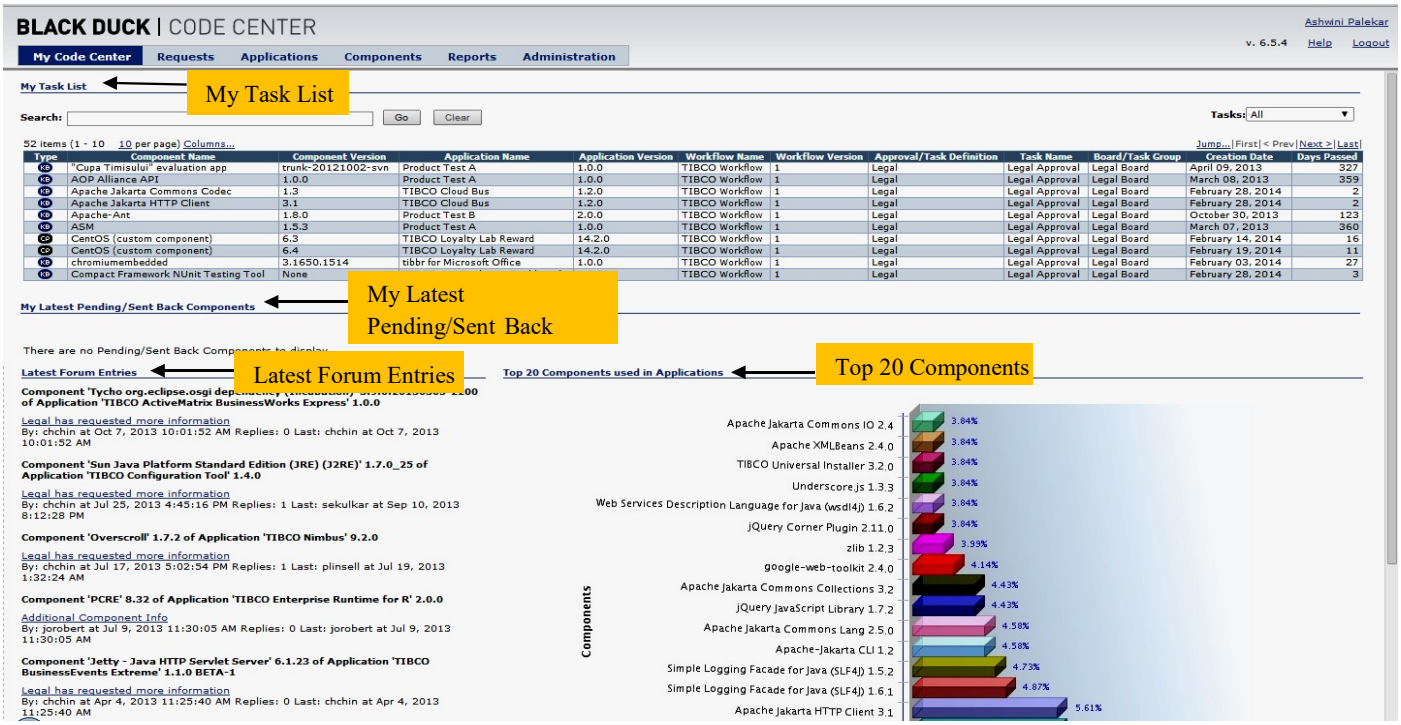

Enter the username and password (LDAP authentication) and click **Login.**

[1] Please note that the "Bill of Materials" in Black Duck Code is rendered as "Embedded Components" in the TIBCO Product Information Management System ("PIMS").

©2019 TIBCO Software Inc. All Rights Reserved. TIBCO Confidential and Proprietary

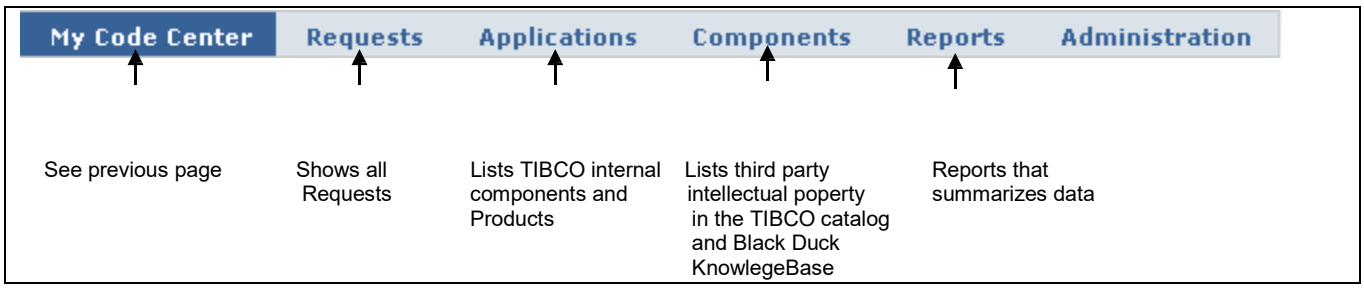

After log in, you will be directed to the following default screen under the **My Code Center** tab:

This screen provides the following information:

- My Latest Pending/Sent Back Component lists components in your applications that have not yet been approved.
- Latest Forum Entries lists discussion threads on component requests.
- Top 20 Components used in Application lists the top 20 most used components.

On the top left corner of the screen are tabs, which navigate users to different sections of the software program.

3. Requesting a Component

There are 3 ways to submit a request for your application (TIBCO internal component/TIBCO Product):

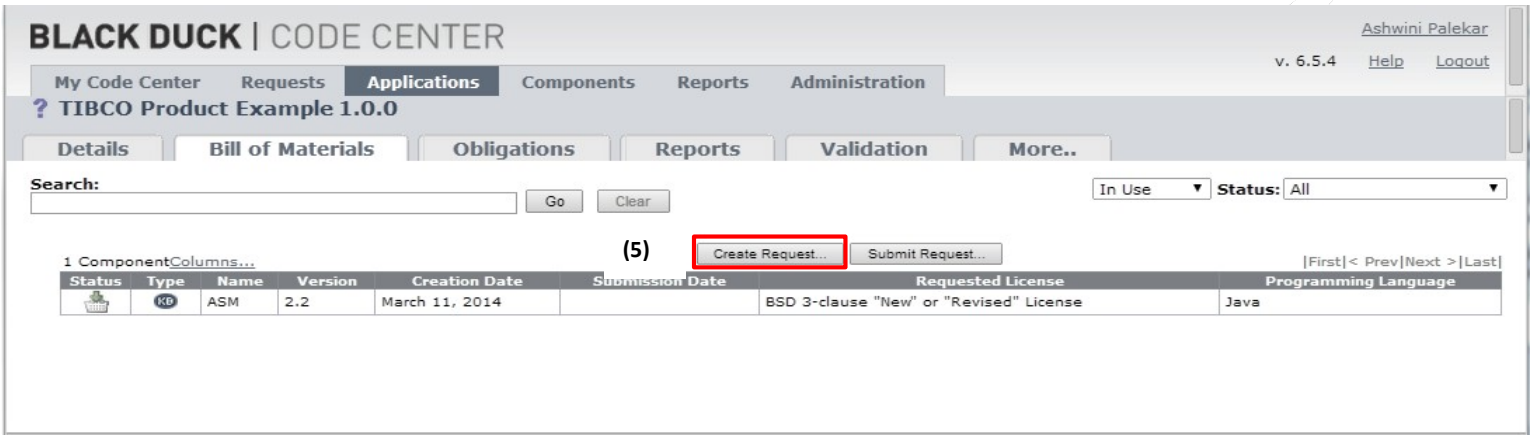

A. Click on the **Requests** tab (1), and then click the **Create Requests** button (2).

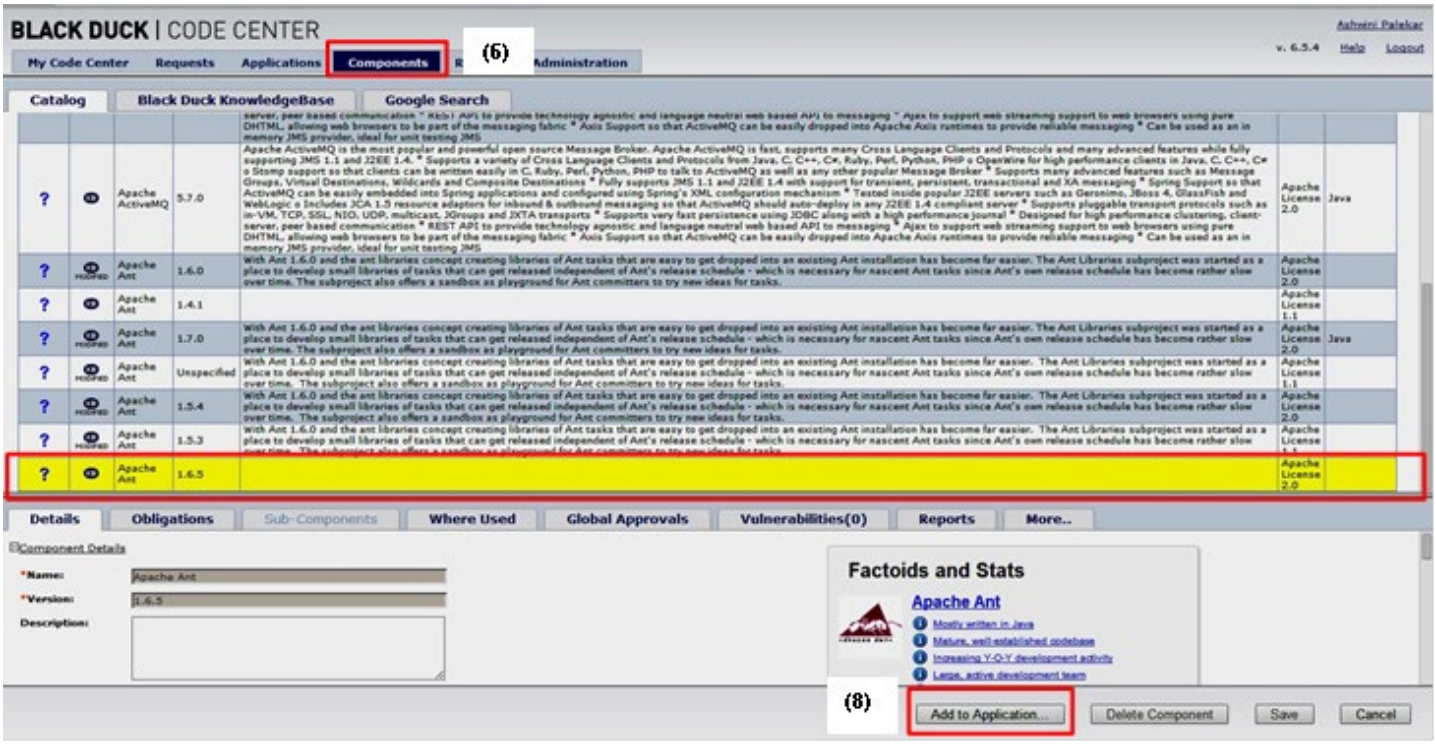

B. Alternatively, you can click on the **Applications** tab (3), select an application (4) and once in the Bill of Materials tab of an application click the **Create Request** button (5).

©2019 TIBCO Software Inc. All Rights Reserved. TIBCO Confidential and Proprietary

C. Lastly, you can create a request by clicking on the **Components** tab (6), selecting from the catalog (7) or Black Duck KnowledgeBase and clicking on the **Add to Application** button (8).

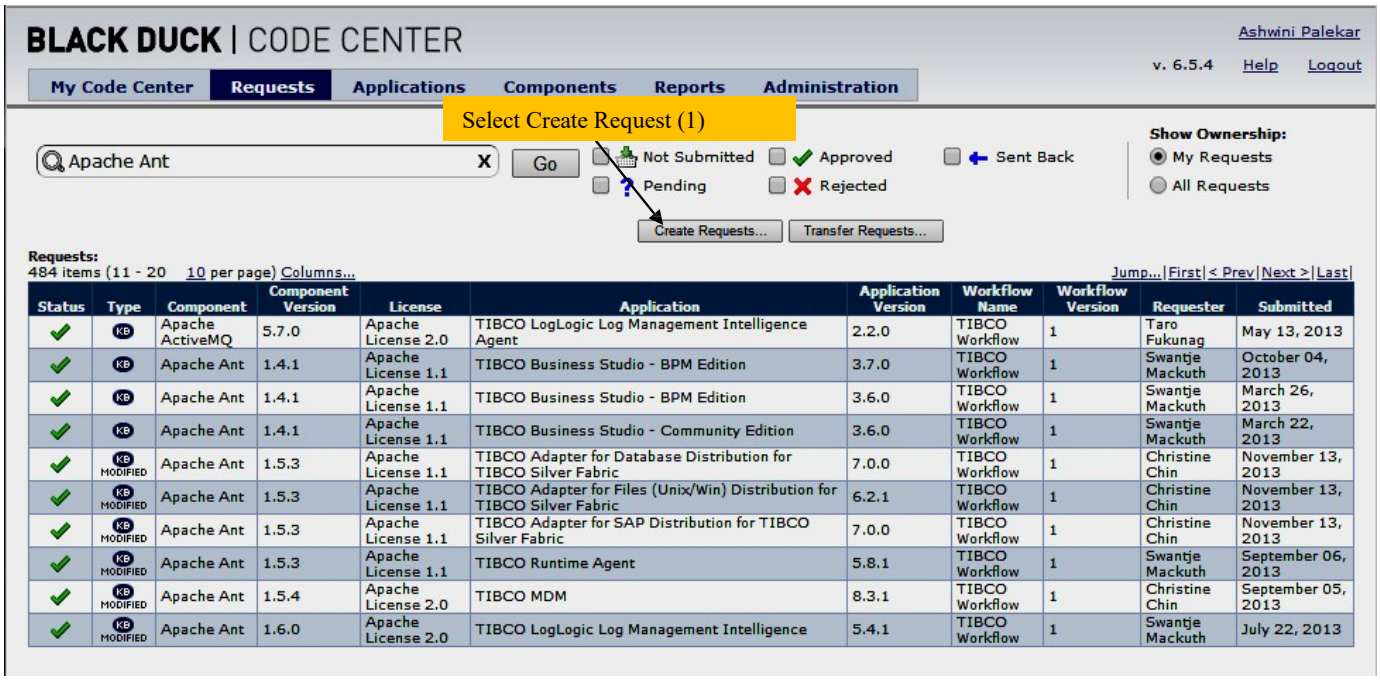

All of the above methods will initiate the request form wizard.

4. Request Form Wizard

Using **Method 1**, follow the steps below to submit a request:

A. Select the **Create Request** (1) button.

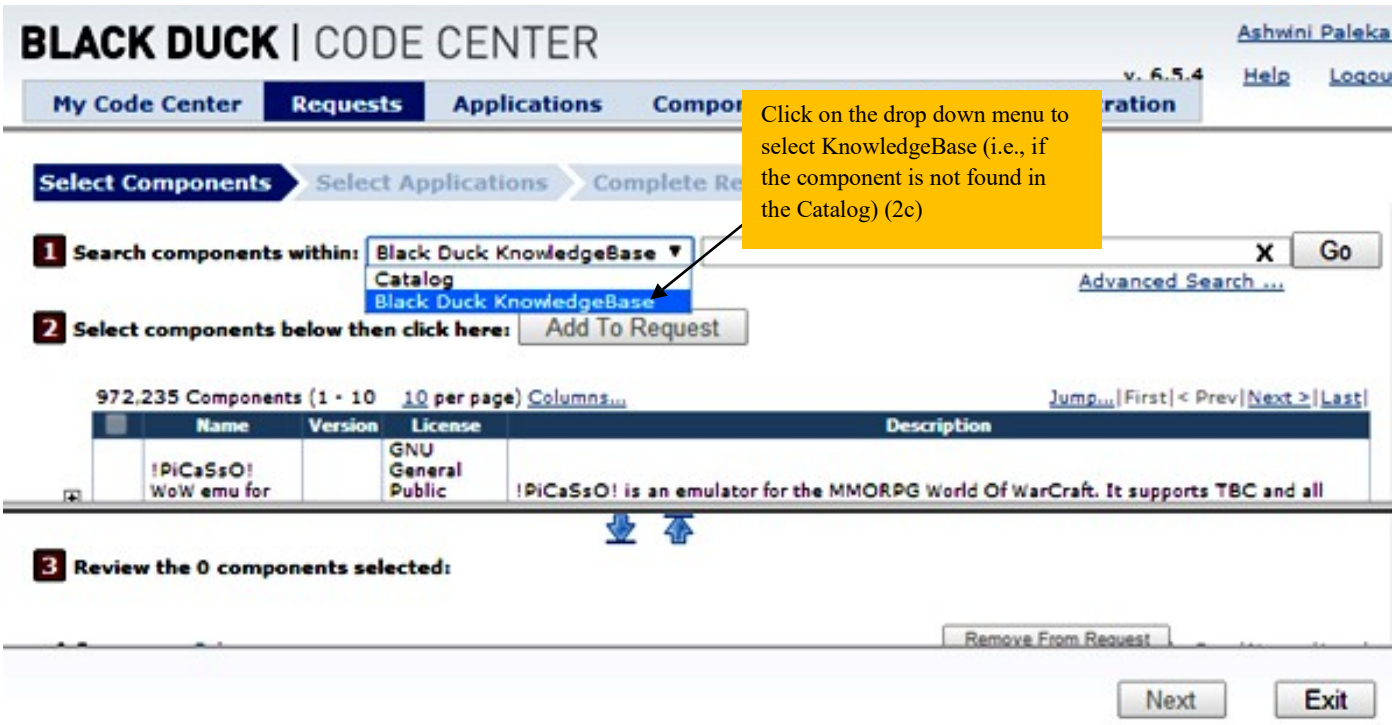

B. You can search for the component within the Catalog (2a), or scroll to find the component name (2b).

©2019 TIBCO Software Inc. All Rights Reserved. TIBCO Confidential and Proprietary

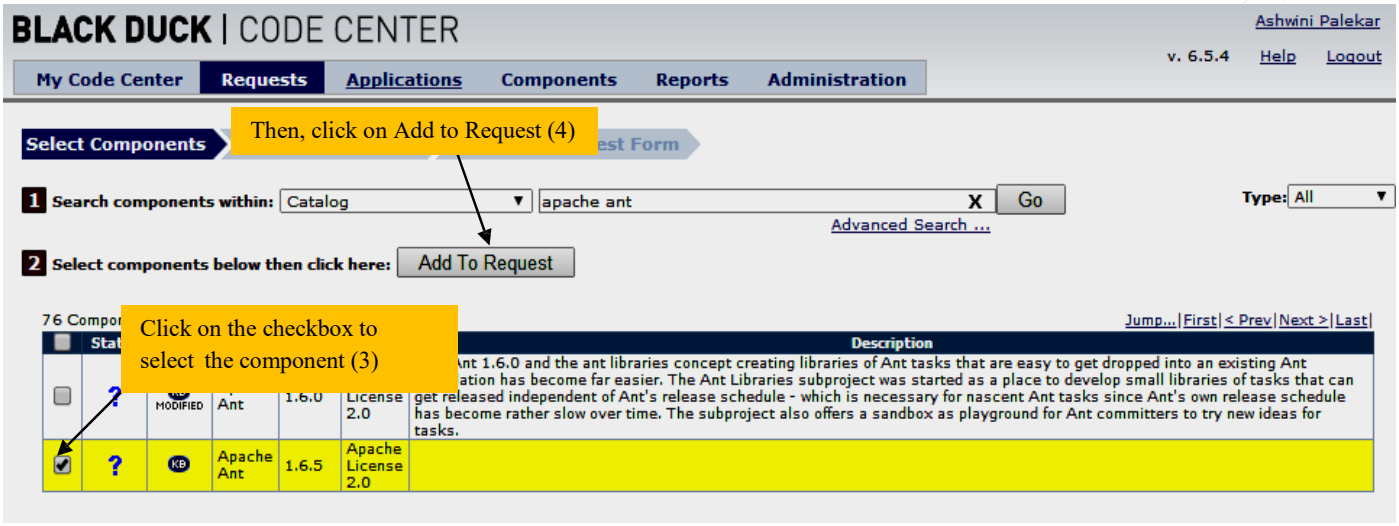

If the component is not found within the Catalog, the next step is to check the Black Duck Knowledge Base from the drop down menu (2c). If you submit a request for a component that you are taking directly from the Black Duck KnowledgeBase, then this component will automatically be added to the Catalog. Once you submit your request for the KnowledgeBase component, you need to go back to the component that can now be found in the Catalog and complete the "Additional Component Information" fields for the component. If you miss this step, you will receive an automated email notification that will prompt you to complete these fields. **Your request will not be approved until you have completed the required "Additional Component Information" fields.**

If the component can also not be found in the KnowledgeBase, you will need to submit a Formvine request at http://formvine.tibco.com/fv/r/5390745351/1404. If you find the component name in the KnowledgeBase but not the version, please list the name as it is found in the KnowledgeBase on the Formvine request form. It is essential that you also identify the name of the TIBCO product in the Formvine form, so the Legal team member handling the submission can complete the request process for the component.

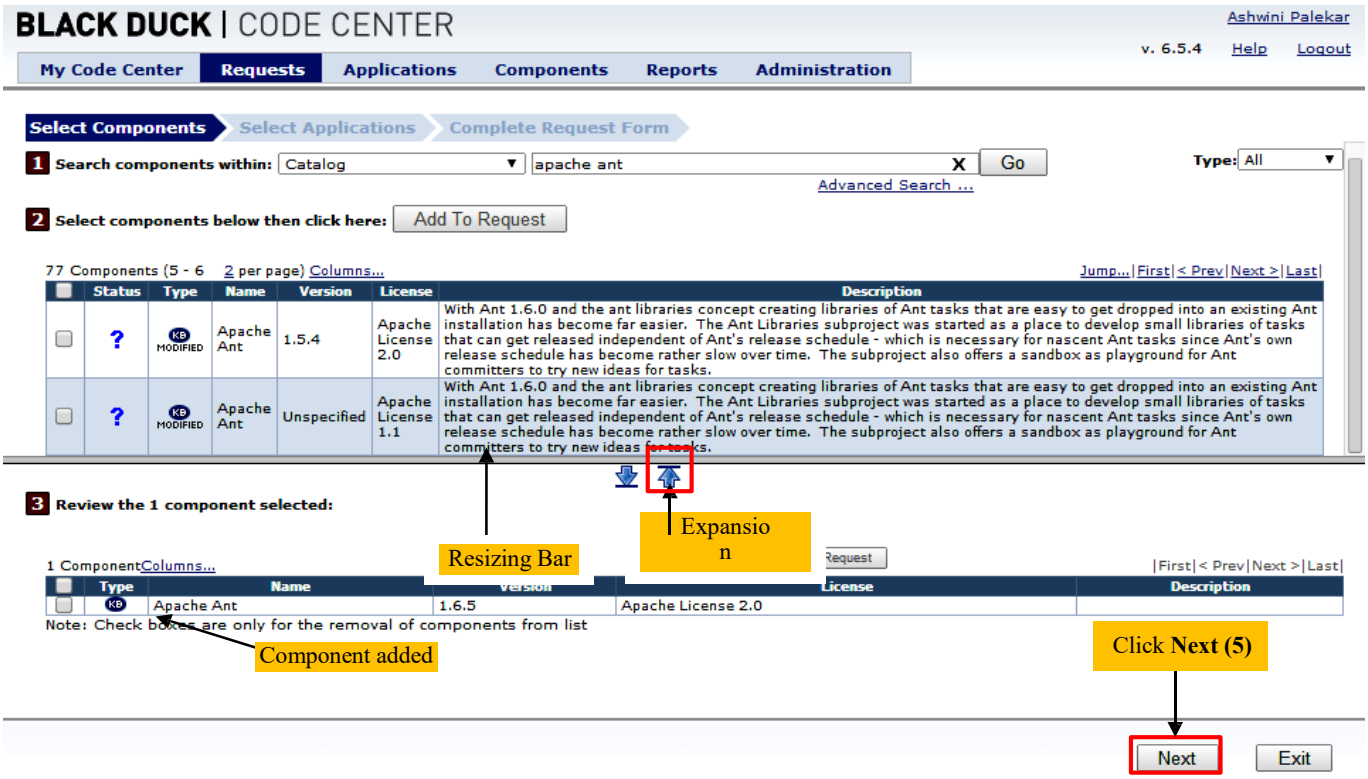

C. Select the component (3) and select the **Add to Request** (4) button.

©2019 TIBCO Software Inc. All Rights Reserved. TIBCO Confidential and Proprietary

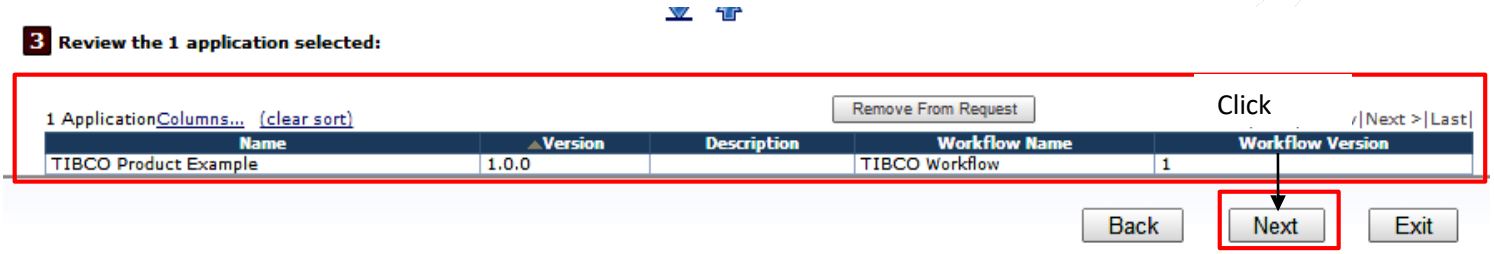

D. Once the component is selected, it gets added to the Request Form (frame below). You can resize the frame if you do not see the frame below or select the expansion button . Click Next (5)

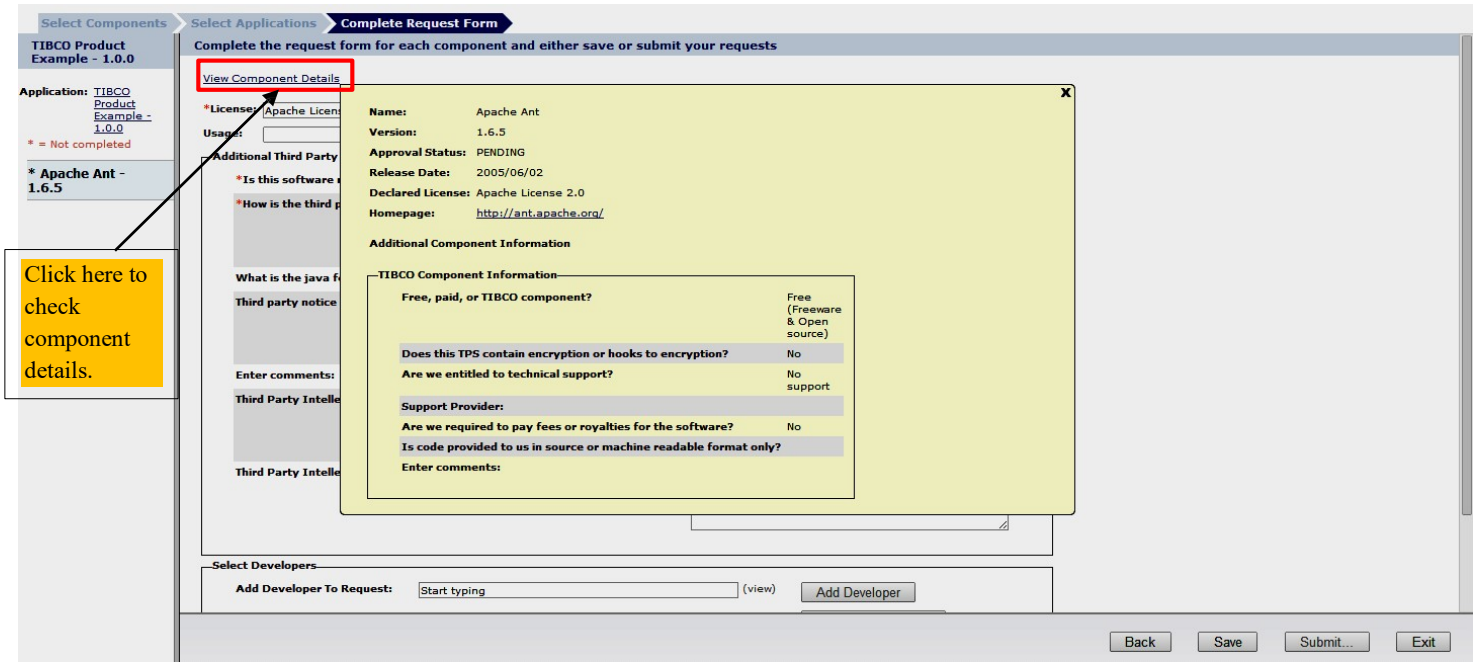

E. The selected application is added to the Request Form, click on **Next.**

©2019 TIBCO Software Inc. All Rights Reserved. TIBCO Confidential and Proprietary

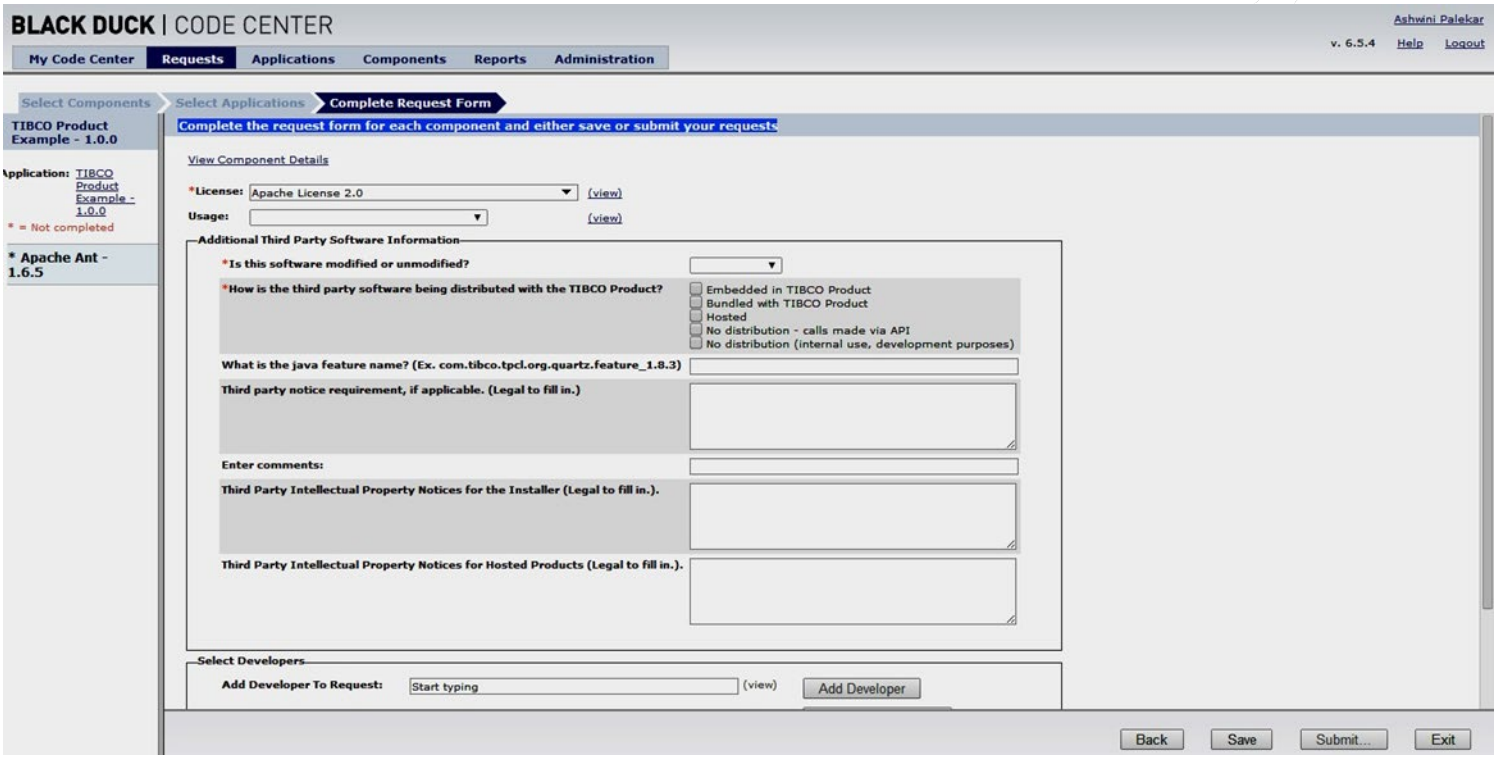

F. Click on **View Component Details.** This will open the following window. Please check to see if component details are correct. If the information in the component details is not correct with the usage of the software, please mention this in the comment section of the request form. If the questions are blank in the component details area, please provide the answers in the comment section of the request form. The component information will then be recorded accordingly. Please do not modify the information in the component details section.

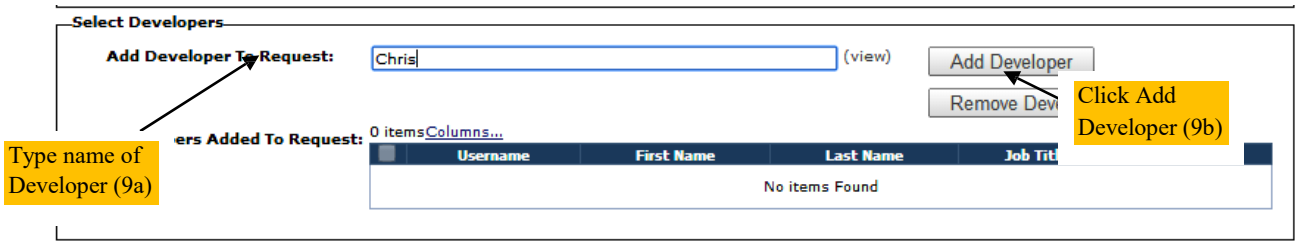

G. Fill out the questions marked with an asterisk on the Request Form before submitting the form.

©2019 TIBCO Software Inc. All Rights Reserved. TIBCO Confidential and Proprietary

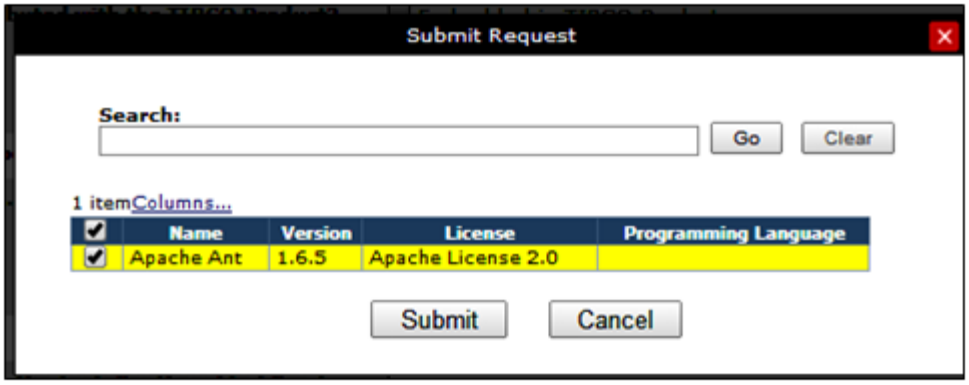

H. You can optionally specify any users (9a, 9b) who are allowed to edit the saved request. Type the name of the user you wish to add, and then click on the **Next** button. (Note: Requests can only be edited before submission, i.e., the requests are saved to submit at a later time).

I. Click on the **Submit** button once you are finished. The Submit button will not be activated until all of the required fields (*) are filled in. This will open the below screen, click on the **Submit** button again. You can also click on **Save** to submit the request at a later time

©2019 TIBCO Software Inc. All Rights Reserved. TIBCO Confidential and Proprietary

J. You will receive email notifications from Black Duck for a number of component request related actions (e.g., when the component has been requested, escalated for review, followed up with discussion string, approved, etc.). Please do not rely on these automated email notifications for the status of the component request. Please go into Black Duck to check the status of the component request.

[Black Duck Code Center] A new component approval has been submitted for review

CodeCenterAdmin@tibco.com

Sent: Tue 3/4/2014 3:11 PM

To: Ashwini Palekar

Dear Ashwini Palekar ,

The following component approval(s) have been submitted for review and approval:-

Application name: TIBCO Product Example
Application Version: 1.0.0
Approval: Legal
Approval Board: Legal Board

Componentlist:-
Apache Ant: 1.6.5: http://codecenter1.tibco.com/codecenter/CCEmailRequestPage?isAtTop=true&CCAppHandle=726800&CCAppBOMCompUseHandle=851625&CCEmailRequest=COMPUSE_APPROVAL

K. The status of the request is displayed under **My Code Center>> My Latest Pending/Sent Back Components** report or on the Bill of Materials of the application.

✔	Indicates that your request has been approved
X	Indicates that your request has been denied
?	Indicates that your request is pending approval
	Indicates that your request has not been submitted

Below is an example of an application with different component statuses.

5. Deleting a Component

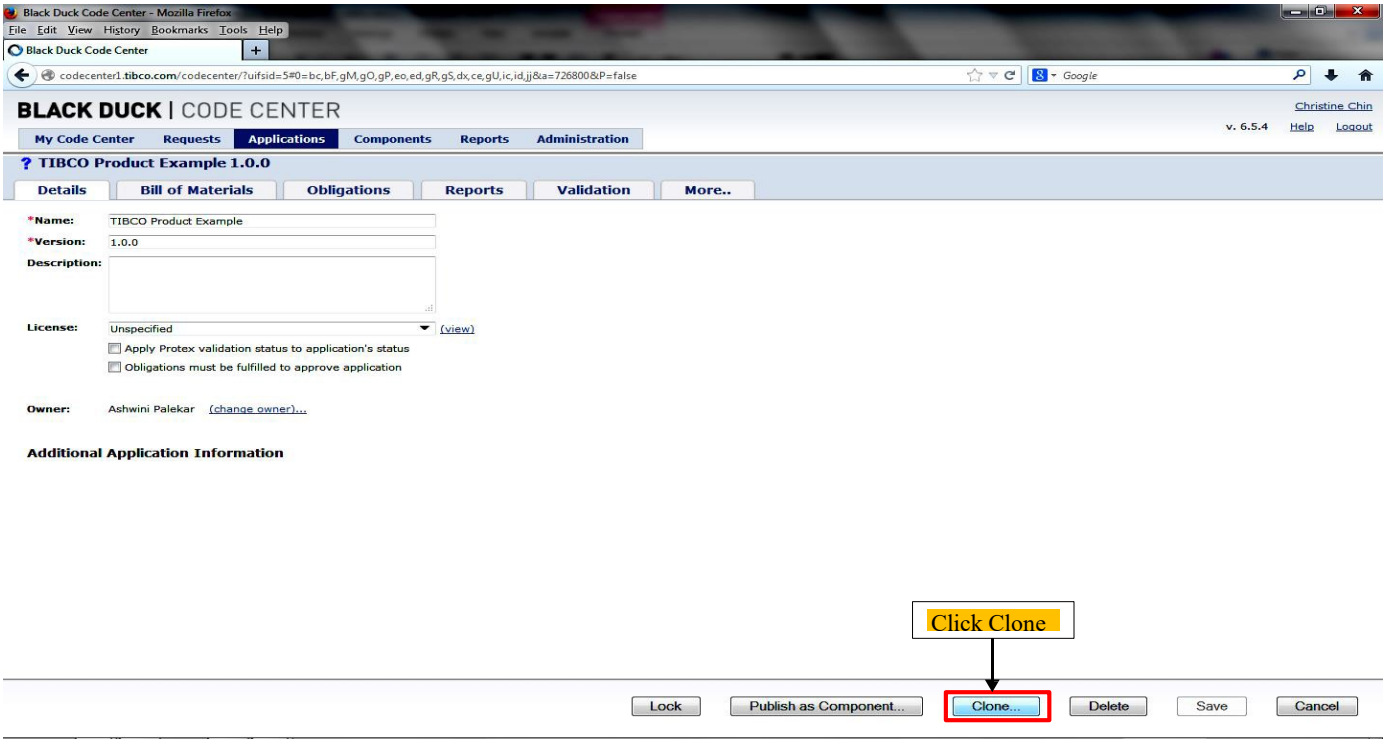

To delete a component, please highlight the component on the Bill of Materials of an application and then select Remove Component from the screen below.

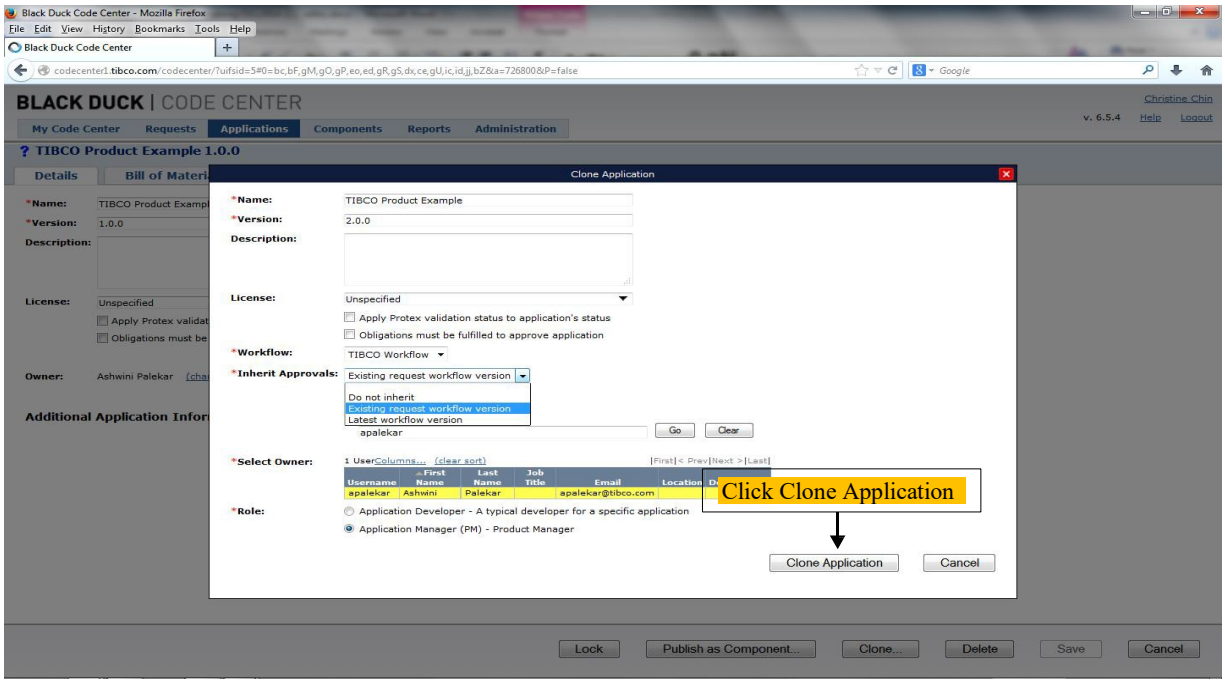

©2019 TIBCO Software Inc. All Rights Reserved. TIBCO Confidential and Proprietary

6. Cloning an Application

A. Go to the Details tab of an application and click Clone

B. Please answer all areas marked with an asterisk and click Clone Application. It may take some time to clone depending on how many items are listed on the Bill of Materials. After this, you need to go through the Bill of Materials and delete any TPS that no longer apply, and request TPS that need to be added.
